大問4A Important information about the tennis tournament

メールを読み、次ページのQ23-Q25に答えなさい。

From: Victoria Hill <info@grand-tennis.com>
To: Jake Adams <j.adams-123@network-globally.com>
Date: April 28
Subject: Important information about the tennis tournament

Dear Jake,

This is Victoria Hill. We are glad to hear that your team will join us again for our next tennis tournament on May 5. This will be our fifth tournament. We are very surprised and excited because we have never had so many teams in a tournament before. This time, we have planned matches not only for men's and women's teams but also for mixed teams.

There is one thing we are sorry to tell you. We see that you want to play in the B-level group. We believe your skills are perfect for that level, too. However, you cannot play in the B-level group. Many teams have asked to play in this group, although we only have ten spots. Because you applied a little late, there are no more spots left.

Therefore, we want to suggest that you play at a higher level, the A-level group. We understand it will be tough, but we believe you can try. Also, you have a choice to move to the C-level group or wait for a team in the B-level group to cancel. However, we encourage you to take part in the A-level group. Otherwise, we will pay you back your tournament fee right away.

Thank you,
Victoria Hill

Salt

Salt is necessary for humans to survive. It is a common item widely available today. Because it gives extra flavor to meals, it may be simply considered an item used for cooking. However, it is not only used to add flavor. Salt was seen very differently in the past. With many historical factors, salt was important in many ways in various cultures around the world.

In the past, people all over the world wanted salt for a variety of reasons. For example, people used salt when there were no refrigerators. This was because it could help food last longer. Salt was also useful in the field of medicine. Past records show that it was used to treat both humans and animals. People relied on salt as a medicine to improve their health conditions and to treat animals' injuries.

History shows that salt was often linked to money and the economy. For example, according to some records, salt was so valuable that it was used as money. In Europe, salt helped some cities grow their economies. Even new cities and roads were built to produce and deliver salt. Moreover, a lot of wars happened over salt around the world. It shows how much salt meant to people throughout history.

It is clear that salt has had a huge impact on people. Nowadays, salt is still used in cooking and medicine. In addition, salt is found in other situations. It is a great cleaner for polishing metal items. It is also helpful to melt snow on the road on snowy days and to prevent the roads from freezing. For these reasons, salt will probably continue to influence people's lives in the future.
