(17) No () how hard he tried, William wasn't able to find the courage to ask Melanie on a date.

- 1 chance 2 matter 3 question 4 wonder

大問2A 長文の語句空所補充 Q18-Q20

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

A Straw for Clean Water

Today, many efforts are being made to provide people around the world with safe drinking water. One example is a company that developed a straw to produce clean water. This special straw is used the same way people use a simple regular straw. When it was invented, a terrible disease was causing problems for the people living in Africa. (18), the original purpose of developing the straw was to improve people's lives by taking the disease out of their lives.

To drink clean water, one side of the straw is put into the water, and people simply drink the water from the other side. The water goes through a special fiber in a plastic tube. The fiber blocks even very small materials to prevent them from entering the mouth. In this way, the water that comes out is (19). The materials contain several kinds of bacteria, and the straw can remove nearly 100 percent of them.

The technology of this straw has developed since the original product was invented years ago. Today, one straw can be used for about 4,000 liters of water. The company that created the straw has also developed many other types of products, and some of them are used when disasters occur. In fact, these products (20) in several countries, such as Thailand and Ecuador. In the future, these products may allow more people to drink safe, clean water in more areas and on more occasions.

(18)

- 1 On the other hand 2 Moreover 3 To be sure 4 Therefore

(19)

- 1 clean enough for people to drink 2 clear but dangerous to drink 3 bad for people's health 4 dirty and harmful to humans

(20)

- 1 worked as helpful tools 2 caused environmental problems 3 damaged natural water 4 turned out to be expensive

大問2B 長文の語句空所補充 Q21-Q23

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

Olive Oil

Spain produces the most olive oil in the world. About 70 percent of olive oil sold in the European Union is produced in Spain, and about 45 percent sold worldwide is also produced in Spain. However, its production has experienced serious damage in recent years due to climate change. The country faces (21) in the areas where olives are grown. This has had a huge impact on the amount of olive oil produced and on its price.

The problem with olive oil production in Spain may cause trouble for this country and the world. This is because a decrease in production in Spain would mean less production in the world. If people still want to buy the oil in this situation, the price will naturally go up. In fact, one of the world's largest olive oil factories in Spain recently reported worrying levels of olive production. (22), the price of olive oil in the country rose rapidly in 2022.

The impact has caused a decrease in the number of sales in Spain. According to the government, more people are choosing cheaper products than olive oil. However, experts are concerned about this change because olive oil is important for (23). Losing olive oil could mean Spanish people lose a big part of their daily eating habits. Therefore, to handle the problem of the lack of rain, some places in the country have introduced solutions to reduce water use.

大問3A Writing Contest

メールを読み、次ページのQ24-Q26に答えなさい。

From: Jacob Francis <general@queens-fall.com>
To: Maria Stone <maria.stone.123@ocean-network.com>
Date: November 12
Subject: Writing contest

My name is Jacob Francis. I am responsible for a writing contest organized by the city. First of all, thank you for sending us your essay. We are very excited to tell you that the essay you wrote about your life goals has been chosen for the first prize in the high school category. Among many essays we received, your work caught our attention for several reasons.

One reason your essay was chosen is your writing skills. The way the story was told and the choice of words were both excellent. The way you expressed your feelings was also great. We could tell how serious you were thinking about your future through your writing. We thought that your view of life would have a positive impact on other high school students. We believe that not only students but also adults can learn something from it.

We would love to share your essay with others. So, it would be great if you could read this essay as a speech in front of an audience at an event next month. The city will be organizing the event. It will attract a large crowd, including a local newspaper company, and is an opportunity to let more people know that we have great students like you. Your help will be much appreciated.

大問3A Writing Contest

前ページのメールを読み、Q24-Q26に答えなさい。

(24) Why did Jacob Francis send an e-mail to Maria Stone?

- 1 To let her know that he received her essay.
- 2 To share the news of her winning a prize.
- 3 To ask her to send him her essay again.
- 4 To tell her about the city's writing contest.

(25) One of the reasons Maria Stone's essay was chosen is that

- 1 young people would agree with her view of life.
- 2 she described what exactly life was all about.
- 3 it used some expressions students do not often use.
- 4 reading her essay would positively influence others.

(26) What did Jacob Francis ask Maria Stone to do?

- 1 Come to the city event to receive an award.
- 2 Practice her speech for a big event outside the city.
- 3 Let people hear her speech at the city event.
- 4 Send her essay to a local newspaper company.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

Polar Bears

There are tens of thousands of polar bears in the world, and most of them live in Canada. Today, climate change has been having a major impact on them. Some polar bears, such as the ones living in some parts of Canada, are already in a difficult or impossible situation to survive. According to one study, since the middle of the 1990s, the level of warming in the Arctic has been more than twice as high as the world average.

Global warming has been having an effect on polar bears' shelter and food supply. They usually live on the ice, and their food source is often other animals they catch on the ice. Ice is important for them. However, when there is less ice due to global warming, many polar bears spend more time on land. Since they cannot catch their food in the water, they find other sources like berries. This causes them to lose weight rapidly, which puts their lives in danger later.

To study the behavior of polar bears further, researchers examined the behavior of twenty polar bears during the summer months for three years. Some bears spent a lot of time resting to save their energy, but most of them tried to look for food. However, the researchers found that almost all of them had lost weight, an average of one kilogram daily. This showed the researchers how difficult it was to survive during summer when they did not have much ice to rely on.

Sadly, studies have shown that it will be tough for most polar bears to exist until 2100 if greenhouse gases are not reduced. In some areas, there is concern that they may not survive until 2030. Other studies also show that there will be no ice in the Arctic in summer by 2040. This, in turn, suggests that polar bears could survive longer if people succeed in reducing the amount of gases produced. This means the lives of these animals depend on human behavior.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

- (27) What is true about global warming in the Arctic?
- 1 The impact is much greater than in other parts of the planet.
 - 2 The impact is much less than what it used to be in the 1990s.
 - 3 The number of polar bears in the Arctic has been increasing.
 - 4 The number of animals in the Arctic is twice as many as in Canada.

- (28) Ice is important for polar bears because
- 1 they can swim whenever they want in order to lose weight.
 - 2 they are safer from enemies when they are on the ice.
 - 3 living on the ice is convenient for them to find other polar bears.
 - 4 living on the ice makes it easier for them to catch their food.

- (29) During the study of polar bears in summer, most polar bears
- 1 searched for ice to find a place to live.
 - 2 took action to find something to eat.
 - 3 were full of energy until the summer ended.
 - 4 ate ice in the end because of a lack of food.

- (30) What could happen if greenhouse gases are not reduced?
- 1 Most polar bears could still be alive one hundred years from now.
 - 2 Polar bears could find a way to survive on their own.
 - 3 The Arctic ice could disappear by 2040, even in winter.
 - 4 Most polar bears could be completely gone by 2100.

- (31) What do we learn from the passage?
- 1 Most of the surviving polar bears today will move to warmer places.
 - 2 There will be more ice in the Arctic and in Canada by 2040.
 - 3 Polar bears lose weight if they cannot find their food on the ice.
 - 4 Polar bears can survive for a long time on only berries.
