3 by

4 below

大問2A 長文の語句空所補充 Q18-Q20

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

A Long River with No Bridges

The Amazon River is known to be the second-longest river in the world, stretching for more than 6,000 kilometers. It runs through at least three countries in South America, and over thirty million people are believed to live along the river. Many large rivers around the world have bridges built over them. (18), there are no bridges on the Amazon River. Therefore, people have to find other ways than using a bridge to travel to the other side. This feature makes the Amazon River unique.

There are several reasons for this fact. According to one expert, there is little need to build bridges because boats and ferries are used to move products and people. Another reason is that (19) building bridges. For example, the soil along the river is too soft to build bridges. Moreover, the water level and width of the Amazon River change a lot throughout the year. This makes it even more difficult to build bridges.

Some people believe that building bridges over the Amazon River may be possible in the future. They think that it will bring positive advantages to society. However, a number of problems have to be handled in order to do so. Moreover, building bridges (20). If the bridges have little positive impact on the economy, the countries will end up losing a lot financially. For this reason, some experts believe that building bridges is not likely to happen anytime soon.

(18)

- 1 In addition
- 2 First
- 3 As a result
- 4 On the other hand

(19)

- 1 many local people are not interested in
- 2 many animals will lose their homes by
- 3 the conditions are not suitable for
- 4 the beautiful scenery will be destroyed by

(20)

- 1 needs a lot of money
- 2 helps to clean the river
- 3 reduces the crime rate
- 4 increases the number of visitors

大問2B 長文の語句空所補充 Q21-Q23

次の英文A, Bを読み, その文意にそって(18)から(23)までの()に入れるのに最も適切なものを選びなさい。

Weather Balloons

A weather balloon is a tool used to send a small machine up high into the sky. The machine is important because it can collect data about the weather in real time. To be specific, it can measure wind, temperature, air pressure, and so on. When (21), the collected data is immediately sent back to the ground. Such data is used for weather forecasts and for climate change research. Scientists can also learn about wind speed and direction by checking the location of the balloon.

A weather balloon often stays in the sky for about two hours. During that time, it can reach an altitude of around thirty thousand meters. The machine carried by the balloon starts collecting data from the moment it is released into the sky from the ground. When the balloon rises higher and higher, it expands little by little. (22), it grows big enough to be broken. Then, the machine falls slowly to the ground with a parachute.

It is believed that a French scientist used a weather balloon for the first time at the end of the nineteenth century. His experiments with weather balloons (23). He learned a lot about the atmosphere that surrounds the earth. Since then, weather balloons have been used around the world. Today, weather balloons are released twice a day in countries all over the world. The fact that so many of them are used every day shows how useful they are in human daily life.

- (21)

1 the balloon is prepared

2 the balloon is in the air

3 the machine is repaired

4 the machine is in the sea
- (22)

1 On the other hand

2 In particular

3 If not

4 Eventually
- (23)

1 proved to be a great success

2 led people to stop using them

3 failed to understand the planet

4 helped him visit many countries

大問3A Speech at School Festival

メールを読み、次ページのQ24-Q26に答えなさい。

From: Harvey Rogers <h.r.0622@ocean-letter.net>
To: Heidi Collins <heidicollins@prime-eletter.com>
Date: October 2
Subject: Speech at school festival

This is Harvey Rogers. I am a high school student at Eagle Lake High School, and I recently talked with you. Thank you for accepting our request to give a speech at our school festival. The festival will be held on Saturday, October 19. Your event is planned to begin at 1 p.m. Many students are excited to meet you, a professional tennis player who graduated from our high school.

We would like to discuss the topics you plan to cover during the event. You already told us that you were thinking of talking about your life as a professional athlete. It would be great if you could also speak about your high school days and how you overcame challenges in your life. If you could share any advice for young people who want to follow their dreams, that would be wonderful too.

We will have a short time for students to ask you some questions. If possible, we would also like to take pictures of you with students. After the talk, we will offer you a tour of the school. You are more than welcome to visit our school's tennis team and meet the players. Just for your information, the school newspaper team is interested in writing a short article about the event.

大問3A Speech at School Festival

前ページのメールを読み、Q24-Q26に答えなさい。

- (24) What is true about Heidi Collins?
- 1 She quit playing tennis as a professional athlete.
 - 2 She was invited to a university as a guest speaker.
 - 3 She will have a tennis tournament on October 19.
 - 4 She went to the same high school as Harvey Rogers.

- (25) Heidi told Harvey that she would talk about
- 1 how she achieved her dream of teaching tennis.
 - 2 how she became a professional photographer.
 - 3 how she lived a professional athlete's life.
 - 4 how she had spent her high school days.

- (26) What will Heidi do on the day of the event?
- 1 Look around the school before the event.
 - 2 Take pictures with students at the event.
 - 3 Have an interview with a local newspaper company.
 - 4 Play tennis against high school students.

大問3B 長文

本文を読み、次ページのQ27-Q31に答えなさい。

A Big Project in Africa

Today, many countries are trying to grow more forests to help solve environmental problems. The Great Green Wall project is a great example. It is not about building an actual wall. In this project, several African countries are working to plant trees and other plants across a wide area. This will help make the soil better, so farmers can grow more crops to sell. And it will eventually help to improve the economies of the countries and the quality of life for the local people.

The area around the Sahara Desert, where the project is happening, used to be full of nature. But now, it is badly damaged. This has happened because of climate change and terrible weather events. Human activities also harmed the area. For example, it was damaged by using the land for farming over and over. Today, hundreds of millions of people live in desert areas. For the local people, scientists are working to prevent more damage and bring back the plants that once grew there.

The project has already shown positive effects. For example, in Senegal, many trees have been planted across a large area. These trees will be useful because the fruits that the trees will produce in the future are good for improving people's health. Ethiopia is another successful country, among others. In this country, growing trees that are native to the area has helped the soil hold more water. One organization says that vast areas of land have already been recovered.

There are several key points to the success of the plan. One of them is providing good care for trees. After trees are planted, the local people must take care of them to help them grow. Another point is creating jobs during the process. In fact, this is one of the goals of the project. By creating jobs, local people can earn more money. In short, the project can help the environment and the economies of African countries.

大問3B 長文設問 Q27-Q31

前ページの本文を読み、最も適切なものを1つ選びなさい。

(27) What is true about the Great Green Wall project?

- 1 It is a project that will build a wall that stretches across the African continent.
- 2 It is a project that has a negative impact on the environment in African countries.
- 3 It is a project that can change the condition of the soil in African countries.
- 4 It is a project that brings all African countries together to create a huge forest.

(28) How did the area around the Sahara Desert get damaged?

- 1 Both natural events and human activities destroyed the environment.
- 2 Scientists removed the plants from the land for research purposes.
- 3 People stopped farming there, so the land became dry and useless.
- 4 The land was destroyed because nobody lived there for many years.

(29) In the country of Senegal,

- 1 people have planted trees whose fruits can improve their physical condition.
- 2 positive effects have been shown only for a short period of time.
- 3 the planted trees have helped the other crops grow well.
- 4 soil quality has become worse despite efforts to plant trees.

(30) What is one of the key points to making the Great Green Wall project successful?

- 1 Hiring only experts to take care of the trees.
- 2 Getting support for money from non-African countries.
- 3 Bringing resources from outside the African continent.
- 4 Increasing the number of jobs for the local people.

(31) What do we learn from the passage?

- 1 Some countries, like Ethiopia, are against the Great Green Wall project.
- 2 The Great Green Wall project includes caring for trees well after planting them.
- 3 It is believed that the Great Green Wall project may not succeed in the end.
- 4 There are almost no people who support the Great Green Wall project at the moment.
